

Coronavirus

There are big changes in our lives, Nursery is closed, play parks are closed and we must stay at home.

Coronavirus is making life very different at the moment.

These changes may be making you feel scared or worried but it is ok to feel like this.

It is our body's way of telling us to take extra care to protect ourselves, like cough or sneeze into a tissue, wash our hands and stay at home.

It will not be like this forever, but while we are at home we are safe and keeping others safe.

We can still enjoy life and do fun things, we can play outside in our garden

We can play inside our home with our toys

We can watch some television or listen to music

Then I will be safe and my parents will be happy with me.
