

## Cutting My Finger Nails

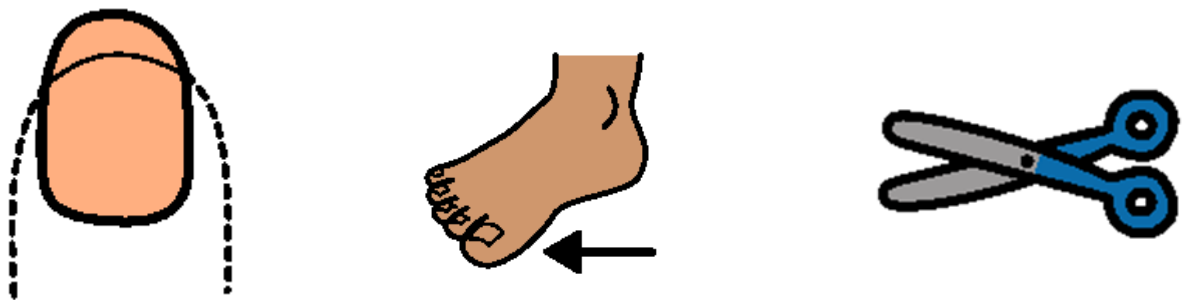

As I grow, my body, my hair and my nails grow.

I need to get both my hair and my nails cut.

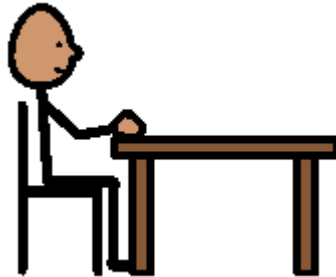

I have two hands and two feet and need all the nails cut.

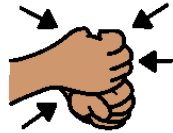

My hands and feet will look different but they are still my hands and feet.

Before cutting my nails, I may like to put them in water to soften them, or push my fingers onto the table.

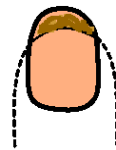

An adult may squeeze the tips of my fingers for a few moments.

They will use go and stop cards.

When my nails are cut, dirt will not get in them or I won't scratch.

When my nails are cut my family and friends will be happy with me.
