**Go Fish!**

1. Take a deck of playing cards and remove the picture cards and the '10' cards.
2. Deal 7 cards to each player and place the remaining cards face down in the centre of the table.
3. Look at your cards and find pairs that add to 10; place these pairs of cards face down in front of you, e.g. 7 and 3.
4. The first player turns to the person directly to their left and asks, 'Do you have a ___?' hoping that they will get a card to pair with one of their cards to make 10.
5. If the player being asked for a card has it, they hand it to the player who asked for the card.
6. If the player does not have the card, they say, 'Go fish' and the player who asked for the card takes a card from the top of the pile of cards in the centre of the table.
7. Play continues in a clockwise direction until the first player has no cards left in their hand because they have paired them all.
8. The game then stops and all players count their pairs. The winner is the player with the most pairs.
9. This game can be played to make any number bond to 20, so choose your number and play again!
