_______________ + _______________ = 10

Education Authority SENIS (Cognition and Learning), April 2020
Number Bonds to 10

- You will need two sets of coloured counters, a whiteboard and a cloth.
- Print the grid and number squares above (or draw the grid on the whiteboard/a piece of paper and write the numbers on pieces of paper).
- Cut out the number squares 0 – 10.
- Place/write a number between 0 and 10 on the second line on the grid and ask your child to work out what number is needed to add to your number to make ten. Then ask your child to find this number on a paper square and place it on the first line/write it on.
- Next, ask your child to highlight the number bonds to 10 by placing counters on the grid, e.g. green counters on the numbers 3 and 7, blue counters on the numbers 0 and 10, etc.
- If you do not have counters, paint pieces of pasta or colour the squares with markers or crayons!
