**Activity**

1. Can you read all the digital times above?

2. Print and cut out the digital clock faces above.

3. Order the digital times, from earliest to latest, from 1:00 to 7:30.

4. Mix the clock faces up and this time use a digital timer and see how long it takes you to put your times in the correct order, from earliest to latest!

5. This activity can be played over and over again - time yourself each time to see if you are getting faster at ordering the times! You could also order the times from latest to earliest!
