

## What is Covid 19?

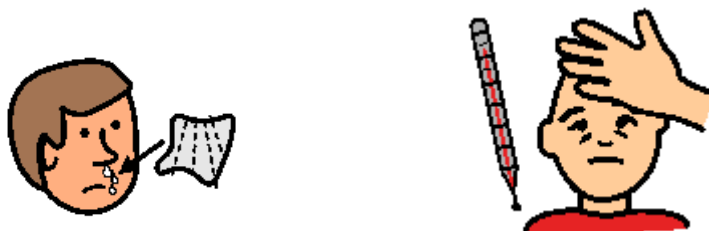

Covid 19 is an infection caused by the Coronavirus, it affects people's breathing and their lungs.

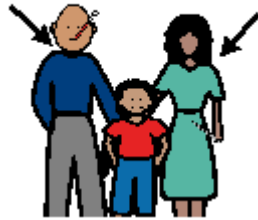

It can be spread from person to person by coughing or touching surfaces that the virus has landed on.

Children who get Covid 19 will usually only be a little unwell or maybe they will have a cough, a high temperature or find it harder to breath.

It is the same for most mums and dads if they get it. Grown-ups with healthy bodies are not likely to become very ill.

Covid 19 can be dangerous for some people. It can make people who have serious diseases or people who are old very sick.

That is why we must do everything we can to protect them from getting it. We must not visit them, but stay at home. That is also why our Nursery and play parks are closed.

Stay safe, stay home.
